CONTENTS

Monograph on Groundwater Quality

Preface 3

V. Beneš, V. Pěkný, J. Skořepa and J. Vrba. Impact of diffuse nitrate pollution sources on groundwater quality—some examples from Czechoslovakia 5

V. M. Goldberg. Groundwater pollution by nitrates from livestock wastes 25

M. G. Khublarian. Chemical substance transport in soils and its effect on groundwater quality 31

B. C. E. Egboka, G. I. Nwankwor, I. P. Orajaka, and A. O. Ejiofor. Principles and problems of environmental pollution of groundwater resources with case examples from developing countries 39

H. M. Selim. Prediction of contaminant retention and transport in soils using kinetic multireaction models 69

G. Ponzini, G. Crosta, and M. Giudici. The hydrogeological role of an aquitard in preventing drinkable water well contamination: a case study 77

N-Z. Sun. Applications of numerical methods to simulate the movement of contaminants in groundwater 97

L. Abriola. Modeling multiphase migration of organic chemicals in groundwater systems—a review and assessment 117

R. Calvet. Adsorption of organic chemicals in soils 145

A. Sabljić. Quantitative modeling of soil sorption for xenobiotic chemicals 179

R. L. Wershaw. Application of membrane model to the sorptive interactions of humic substances 191

Y. Soma and M. Soma. Chemical reactions of organic compounds on clay surfaces 205
